Problem1

- Write a program and ask the user to enter 4 numbers. Then do the following:
 - Add all those numbers together and print the result
 - Find the number which is the biggest between the 4 numbers
 - Print all numbers in one line (they all to be printed in a single line)

Problem2

- Write a python programs which find the closest distance to the center of the coordination system:

Problem3

- Write a python program which receives a word with length 7 from input and insert a star character, *, between each alphabet of the word. For instance if the user entered “alireza” then your program should change it to a*l*i*r*e*z*a* and prints it.
